

## Michael Westman

### PROFESSIONAL SUMMARY

Full-Stack Java Developer with 8+ years of experience building secure, scalable, and high-performance enterprise applications across fintech, insurance, automotive, and payments industries.

Experienced in Java, Spring Boot, Kafka, PostgreSQL, Docker, React, REST APIs, microservices, event-driven systems, enterprise integrations, Agile, SAFe Agile, CI/CD, and AI-assisted development workflows.

Strong contributor to enterprise solutions at BMW Group, PPS, and Stanchion Payment Solutions.

### TECHNICAL SKILLS

- Java • Spring Boot • Kafka • PostgreSQL • Docker • React • Angular
- REST APIs • JWT Authentication • Spring Security • Microservices
- Jenkins • Git • Bitbucket • Swagger/OpenAPI • Prometheus • Grafana
- Agile • Scrum • SAFe Agile • DevOps • AI-Assisted Development

### FREELANCE & VOLUNTEER EXPERIENCE

Freelance Software Developer / Technical Consultant (Sep 2025 – Present)

- Developed custom automation systems and workflow solutions
- Built reporting and document generation platforms
- Assisted small businesses with digital transformation initiatives
- Supported AI-assisted development and intelligent workflow automation

Helping Paws In Need SA — Volunteer Technical Contributor

- Supported operational workflow automation and digital systems
- Assisted with lightweight management and engagement platforms

### PROFESSIONAL EXPERIENCE

Stanchion Payment Solutions — Software Engineer  
Mar 2025 – Aug 2025

- Designed scalable Spring Boot payment systems
- Improved microservices scalability and reliability
- Conducted code reviews, testing, and architecture contributions

PPS — Full Stack Java Developer  
Mar 2022 – Dec 2024

- Developed secure enterprise APIs using Java and Spring Boot
- Built APIs using OpenAPI specifications
- Worked within SAFe Agile and DevOps environments

BMW Group — Full Stack Java Developer  
Jun 2021 – Feb 2022

- Developed Angular frontend interfaces and backend Java systems
- Supported production systems, CI/CD, and multilingual enhancements

Cash Connect South Africa — Support Lead & Customer Success Developer  
Jan 2021 – May 2021

- Maintained internal and client-facing systems
- Provided support, troubleshooting, and refactoring improvements

MHA Management Holdings — Head of Technical Operations / Software Developer  
Dec 2016 – Dec 2020

- Developed enterprise reporting and automation systems
- Led technical support and mentoring initiatives

## FEATURED PROJECT

Event-Driven E-Commerce Platform

Production-grade e-commerce platform using Java, Spring Boot, Kafka, PostgreSQL, React, and Docker.

Key highlights:

- JWT authentication and secure API architecture
- Kafka-based asynchronous workflows
- React admin dashboard
- Observability with Prometheus and Grafana

## AI & AUTOMATION

Uses ChatGPT, GitHub Copilot, and Ollama to accelerate development, troubleshoot issues, improve documentation, and support intelligent automation workflows.

Built OCR and AI-assisted workflow solutions using Java Spring Boot and local AI models.

## EDUCATION

Java Developer Certification — 85% Average  
VZAP | 2016

Matric Certificate — Top Matriculant  
Norkem Park High School | 2011
